11	Test Checklist Summary	25

Phase 0 — Server Check & Restart Steps

Before testing any feature, the database and dev server must both be running. Follow these steps every time you start a test session.

Step 0.1 — Check if SQL Server is running

The database is hosted at 192.168.1.160:1433 (SQL Server). If the API returns 500 errors with 'Can't reach database server', the DB is down.

1. Open PowerShell or Command Prompt
2. Run this test command:

```
Test-NetConnection -ComputerName 192.168.1.160 -Port 1433
```
3. If TcpTestSucceeded = True !' DB is reachable. Continue to Step 0.3.
4. If TcpTestSucceeded = False !' DB is down. Continue to Step 0.2.

Step 0.2 — Start SQL Server (if down)

The SQL Server service may need to be started on the host machine (192.168.1.160):

1. Log in to the server at 192.168.1.160 (RDP or local access)
2. Open Services (services.msc)
3. Find "SQL Server (MSSQLSERVER)" or the named instance
4. Right-click !' Start
5. Wait for status = Running
6. Re-run the Test-NetConnection command from Step 0.1
7. If still failing, check firewall rules for port 1433

Step 0.3 — Check if Next.js dev server is running

1. Open a browser and go to: <http://localhost:3000>
2. If you see the login page !' server is running. Continue to Step 0.5.
3. If the page does not load !' server is down. Continue to Step 0.4.

Step 0.4 — Start the Next.js dev server

1. Open PowerShell in the HRMS project directory:

```
cd D:\HRMS
```
2. Start the dev server:

```
npm run dev
```
3. Wait for the output:

```
' Ready in XXXms
- Local:      http://localhost:3000
- Network:    http://192.168.100.3:3000
```
4. If port 3000 is already in use, kill existing Node processes first:

```
Stop-Process -Name node -Force -ErrorAction SilentlyContinue
Start-Sleep 2
npm run dev
```

Step 0.5 — Log in

1. Open <http://localhost:3000> in your browser
2. You will be redirected to /login
3. Log in with an admin or HR account (the account must have the required permissions)
4. After login, you should see the dashboard
5. The hrms-token cookie is now set — all pages and APIs will work

Step 0.6 — Quick health check

After login, verify the system is healthy by checking these 3 things:

1. Go to /payroll/processing/salary !' should load without errors
2. Go to /workforce/shift-plan !' should show the shift grid

3. Go to /masters/holidays !' should show the 3-tab holiday master

If any of these 3 pages show errors, the DB connection is likely still down. Go back to Step 0.2.

Phase 1 — Masters Setup

Verify all master configurations are in place before testing transactions. Each sub-section has verification steps and an action to test.

1.1 Shift Master

Page: /masters/shift-masters

Verify:

- 4+ shifts listed (GENERAL, MORNING, EVENING, NIGHT)
- Each has start/end time, grace minutes, night-allowed flag
- GENERAL = 09:00-17:30, NIGHT = 22:00-06:00

Test:

1. Click Edit on GENERAL
2. Change grace minutes to 10
3. Save
4. Verify the value persists (reload the page)
5. Change it back to the original value

1.2 Departments

Page: /masters/departments

Verify:

- IT, MANAGEMENT REPRESENTATIVE, and other departments listed
- Each has a code and name

Test:

1. Note which departments exist — needed for weekly-off config
2. Verify each active employee belongs to a department

1.3 Holiday Master (3 Tabs)

Page: /masters/holidays

This page has 3 tabs: Declared Holidays, Department Weekly Off, Yearly Leave Calendar.

Tab A — Declared Holidays

Verify:

- List of holidays with date tile, name, type badge (Company/Festival/Government)
- Search and pagination work

Test:

1. Click "+ Add Holiday"
2. Fill: Company = your company, Date = 2026-08-15, Name = Independence Day, Type = Government
3. Save !' verify it appears in the list with the correct date tile and type badge
4. Click Edit on the new holiday !' change type to Festival !' Save !' verify badge colour changes
5. Click Delete !' confirm !' verify it disappears

Tab B — Department Weekly Off

Verify:

- KPI strip: total departments, configured count, default (Sunday) count
- Each department shows a Mon-Sun chip row
- IT and MGMT REP have Sun+Sat highlighted (frozen = amber)
- "Effective weekly off" column shows the configured days

Test:

1. Find a department with no config (shows "Default · Sunday")
2. Click the Saturday chip !' it turns amber (frozen)
3. Verify "Effective weekly off" column now shows Sunday + Saturday badges
4. Click Saturday again !' it unfreezes !' back to "Default · Sunday"
5. Use the filter box to search a department by name !' verify list narrows

Tab C — Yearly Leave Calendar

Verify:

- Calendar shows the current month with colour-coded day cells
- Leave Types panel on the right shows types with colour swatches and day counts
- Month list below shows entries for the visible month
- Today is highlighted with a green border

Test:

1. Navigate to August 2026 using the < > buttons
2. Click on August 15 !' a modal opens
3. Pick "National Holiday" leave type, enter "Independence Day"
4. Save !' verify Aug 15 now has a coloured cell on the calendar
5. Verify the Leave Types panel count incremented for that type
6. Click Aug 15 again !' click "Remove" !' verify it is cleared
7. Click "+ Leave Type" !' create a new type "Company Off" with blue colour
8. Verify it appears in the legend with 0 days

1.4 LOM Config

Page: /masters/lom-config

Verify:

- Calculation Basis = GROSS
- Multiplier = 1
- Shift Duration Source = SHIFT_MASTER
- Grace Minutes Exempt = 15
- Daily LOM Cap = 240

Test:

1. Change grace to 20 !' Save !' verify it persists
2. Change it back to 15 !' Save

1.5 Payroll Workflow Config

Page: /masters/payroll-workflow-config

Verify:

- Which optional stages are enabled (VALIDATED / SUBMITTED / POSTED)
- Approval chain setting (HR Only / Manager-HR / HR-Finance / Manager-HR-Finance)

Test:

1. Toggle "Enable VALIDATED Stage" on !' Save
2. Go to Salary Processing !' verify the pipeline stepper shows the Validated stage
3. Come back and toggle it off !' Save (to keep the default chain)

1.6 OT Plans

Page: /masters/ot-plans

- Verify: OT plan exists with multiplier, applicable days, settlement options

1.7 Comp-Off Policy

Page: /masters/comp-off-policy

- Verify: Comp-off credit rules, expiry policy, encashment rules

1.8 Approval Chain Config

Page: /masters/approval-chain

- Verify: Shift change approval chain stages (Manager -> HR, etc.)

Phase 2 — Employee & Salary Structure

2.1 Employee Master

Page: /employees (or /masters/employees)

Verify:

- 12 active employees visible (RC027-RC037, RC114)
- 76 deactivated employees not shown (or shown as inactive)
- Each has department, designation, reporting manager
- oldEmployeeCode matches their biometric device ID

Test:

1. Open RC027 !' verify oldEmployeeCode matches their biometric device ID
2. Verify reporting manager is set (needed for OT/shift-change approval chain)
3. Verify salary structure is assigned
4. Verify department is set

2.2 Salary Structure / Salary Details

Page: /masters/salary-structures and per-employee salary details

Verify:

- Salary components are dynamic (whatever was added in Salary Components page)
- Each active employee has a salary structure with basic, HRA, allowances, PF, ESI etc.

Test:

1. Open an employee salary details page
2. Verify gross, PF rate, ESI rate are set
3. Verify salary components match what was configured in the Salary Components master

Phase 3 — Biometric & Attendance

3.1 Biometric Integration

Page: /workforce/attendance/biometric

Verify:

- Device controller connection status (on-premise controller)
- Last sync run timestamp and result
- Device users listed

Test:

1. Click "Fetch Attendance" (or Sync)
2. Select a date range (e.g. 2026-07-01 to 2026-07-31)
3. Wait for sync to complete
4. Verify: fetched > 0, created/updated > 0, unmatched = 0
5. Verify employee matching worked (oldEmployeeCode -> device user ID)

3.2 Daily Attendance

Page: /workforce/attendance/daily

Verify:

- 12 employees x 31 days = ~372 records for July 2026
- Each record shows: inTime, outTime, shift, status (Present/Absent/WeeklyOff/Holiday)
- isWeeklyOffWorked and isHolidayWorked flags set automatically for Sun/holiday work
- earlyOutMinutes calculated when checkout is before shift end

Test:

1. Filter by date 2026-07-26 (Sunday) !' verify employees who worked show isWeeklyOffWorked=true
2. Filter by a weekday !' verify isWeeklyOffWorked=false
3. Look for any record with earlyOutMinutes > 0 !' verify it is queued for LOM approval

3.3 Monthly Attendance

Page: /workforce/attendance/monthly

Verify: Monthly grid for July 2026 with per-day status colours

Test:

1. Select July 2026
2. Click "Finalize"
3. Verify summary is generated without database errors

3.4 Attendance Overview

Page: /workforce/attendance/overview

- Verify: Department-wise summary, present/absent/late counts

3.5 Time Office Final

Page: /workforce/attendance/time-office-final

- Verify: Consolidated time-office view with OT, LOM, weekly-off, holiday work columns

Phase 4 — Approvals

4.1 OT Approval (Manager -> HR)

Page: /approvals/workforce/overtime

Verify:

- KPI strip: "Awaiting Manager", "Awaiting HR", "Total Pending OT"
- Two sections: "Pending My Approval (Reporting Manager)" and "Pending HR Approval"
- Each row shows employee, date (with Weekly-Off/Holiday tag), OT worked hours

Test A — Single Approve (Manager -> HR):

1. In the Manager section, click "Approve" on a row
2. Confirm !' the row moves to the HR section
3. In the HR section, click "Approve" on that row
4. If it is a Sunday/holiday !' a settlement picker appears (Paid OT vs Comp-Off)
5. Pick "Comp-Off" !' verify it is approved

Test B — Bulk Approve:

1. Select 5+ rows via checkboxes (or "Select all")
2. Pick settlement type (for HR scope): OT or Comp-Off
3. Click "Approve selected" !' confirm
4. Verify success message: "Approved X of Y (Z skipped)"
5. Verify selected rows disappear from the queue

Test C — Reject:

1. Click "Reject" on a row
2. Enter rejection reason !' submit
3. Verify the row disappears from the pending queue

4.2 LOM Approval

Page: /approvals/workforce/lom

Verify:

- KPI strip: Pending entries, Pending Late, Pending Early Out, Approved for Deduction
- Tabs: Pending / Approved / Rejected with counts
- Each row shows late minutes (amber chip), early-out minutes (red chip), total

Test A — Bulk Approve:

1. On the "Pending" tab, select a few rows via checkboxes
2. Click "Approve selected" !' confirm
3. Switch to "Approved" tab !' verify the rows appear with "Approved (after grace)" column
4. Verify the KPI "Approved for Deduction" increased

Test B — Reject:

1. Click "Reject" on a pending row
2. Enter rejection reason !' submit
3. Switch to "Rejected" tab !' verify the row appears there

Test C — Tab counts:

1. Verify the Pending tab count matches the number of rows shown
2. Verify the Approved tab count matches approved rows
3. Verify the Rejected tab count matches rejected rows

4.3 Mispunch Approval

Page: /approvals/workforce/mispunch

- Verify: Pending mispunch requests with approve/reject actions

4.4 Leave Approval

Page: /approvals/workforce/leave

- Verify: Pending leave applications with approve/reject

4.5 Permission Approval

Page: /approvals/workforce/permission

- Verify: Pending permission requests (short-duration leave)

Phase 5 — Shift Management

5.1 Shift Plan

Page: /workforce/shift-plan

Verify:

- KPI strip: Employees Scheduled, Manual Overrides, Night Shift Days
- Week/Month toggle works
- Grid with sticky employee column, date columns
- Today column highlighted in green
- Weekend columns shaded
- Each cell shows shift code + time range, colour-coded
- Override cells have orange outline
- Legend chips at top showing each shift with its colour

Test A — Single Override:

1. Click on any cell !' a modal opens
2. Pick a different shift from the tile picker
3. Enter reason "Testing override"
4. Click "Save Override"
5. Verify the cell now has an orange outline and shows the new shift
6. Hover the cell !' an X button appears !' click it !' override removed

Test B — Navigation:

1. Click Prev / Next / Today !' verify week/month changes
2. Switch to Month view !' verify full month grid renders
3. Use the employee filter !' verify list narrows

5.2 Shift Change Request

Page: /workforce/shift-change-request

Verify:

- KPI strip: My Requests, Awaiting Approval, Approved, Pending My Action
- Two sections: "Pending My Approval" and "My Requests"
- Each row shows from -> to shift chips, status badge with stage number

Test — Create + Full Approval Chain:

1. Click "+ New Request"
2. Pick a date (e.g. tomorrow)
3. Select a target shift (different from current)
4. Enter reason "Need to change shift for personal reasons"
5. Submit ! verify it appears in "My Requests" with status "pending - stage 1"
6. Switch to "Pending My Approval" section
7. Click "Approve" ! if multi-stage, approve through each stage
8. Verify final status = "approved"
9. Go to Shift Plan ! verify a shift override was created for that date

5.3 Shift Notifications

Page: /workforce/shift-notifications

Verify:

- KPI strip: Unread, Upcoming Changes, Total Notifications
- Unread/All filter tabs
- Notifications grouped by shift date
- Each shows from -> to shift chips, reason, relative time ("2h ago")
- Unread notifications have blue background + "New" badge

Test:

1. After approving a shift change request (Phase 5.2), come here
2. Verify a new notification appeared for the employee
3. Click on the unread notification ! it marks as read (background turns normal)
4. Click "Mark all as read" ! verify all unread badges clear
5. Switch to "All" tab ! verify both read and unread notifications show

5.4 Bulk Shift Upload

Page: /workforce/bulk-shift-upload

Verify:

- 3-step stepper: Prepare file -> Upload -> Review results
- File format table showing required columns (employeeCode, date, shiftCode)
- Drag-and-drop zone

Test:

1. Click "Download CSV template" !' verify file downloads
2. Edit the CSV with this content:
employeeCode,date,shiftCode
RC027,2026-07-28,GENERAL
RC028,2026-07-28,GENERAL
INVALID,2026-07-28,GENERAL
RC029,2026-07-28,WRONGSHIFT
3. Drag the file into the upload zone (or click to browse)
4. Verify file name + size shown in the drop zone
5. Click "Upload & apply"
6. Verify result KPIs: 2 created, 2 errors
7. Switch to "All rows" tab !' verify all 4 rows shown with status
8. Go to Shift Plan !' navigate to 2026-07-28 !' verify RC027 and RC028 have GENERAL override
9. Go to Shift Notifications !' verify 2 notifications were created for RC027 and RC028

Phase 6 — Comp-Off

6.1 Comp-Off Request

Page: /workforce/comp-off-request

Verify:

- KPI strip: Total, Pending, Approved, Rejected
- All/Pending/Approved/Rejected filter tabs
- Each request card shows "Worked on -> Comp-off on" date tiles
- Status badge with dot indicator

Test A — Employee Request:

1. Click "+ Request Comp-off"
2. Worked date = 2026-07-26 (Sunday, must have approved OT)
3. Comp-off date = 2026-08-10
4. Enter reason "Worked on Sunday for production support"
5. Submit !' verify it appears with status "pending"

Test B — Duplicate Prevention:

1. Try creating another request for the same worked date (2026-07-26)
2. Verify it is rejected with "A comp-off request for this worked date already exists"

Test C — HR Approve:

1. Switch to HR view (if logged in as HR/admin)
2. Click "Approve" on the pending request
3. Verify status changes to "approved"
4. Verify success message: "Comp-off approved — 1 day credited"

Test D — Reject:

1. Create another request for a different worked date
2. Click "Reject" !' enter reason !' submit
3. Verify status = "rejected" and reason shown on the card

Phase 7 — Payroll Processing (Full Pipeline)

7.1 Salary Processing

Page: /payroll/processing/salary

Verify:

- PageHeader with period picker (month + year) and status badge
- Pipeline stepper showing stages reached (Draft -> Calculated -> ... -> Posted)
- KPI strip: Employees, Total Gross, Total Deductions, Total Net
- Employee grid with INR formatting, HOLD badges, payslip links
- Action toolbar changes based on run status

Test A — Full Pipeline on a Fresh Run:

1. Pick a month with no run yet (e.g. August 2026)
2. Click "Create Run"
3. Verify status = DRAFT, stepper shows "Draft" as active
4. Click "Calculate" !' verify "Calculated 12 employee(s)" message
5. Verify KPIs populate (gross, OT, deductions, net)
6. Verify grid shows each employee with payable days, gross, net salary
7. Click "Approve" !' status = APPROVED, stepper advances
8. Click "Lock" !' status = LOCKED
9. If POSTED stage is enabled, click "Post" !' status = POSTED
10. Verify action toolbar shows "This run is locked — no further changes"

Test B — Existing Run (July 2026, Run ID 31):

1. Navigate to July 2026
2. Verify status = POSTED (from earlier testing)
3. Verify all 12 employees have net salary values
4. Click "View" payslip on any row !' verify payslip page opens

7.2 Additions / Deductions

Page: /payroll/processing/additions-deductions?runId=X

Test:

1. Add a one-time bonus to RC027 !' save
2. Recalculate the run !' verify net salary increased for RC027

7.3 Bulk Upload Benefits

Page: /payroll/processing/salary/bulk-adhoc?runId=X

- Verify: CSV upload for canteen/petrol/other benefits works

7.4 Payslip (Individual)

Page: /payroll/outputs/payslip?runId=31&lineId=X

Verify:

- Payslip shows employee name, code, designation
- Earnings: basic, HRA, allowances, OT, night allowance
- Deductions: PF, ESI, PT, TDS, LOM, other
- Gross, total deductions, net salary
- Pay period, working days, payable days, LOP

Test:

1. Open payslip for RC027
2. Verify all sections render
3. Verify net = gross - deductions

7.5 Payslip (Bulk)

Page: /payroll/outputs/payslip-bulk

- Verify: Can generate payslips for all employees in a run

7.6 Bank Transfer File

Page: /payroll/outputs/bank-transfer

Verify:

- Bank file can be generated from a locked/posted run
- Shows employee bank account, net salary, IFSC

Test:

1. Select run 31 (July 2026)
2. Generate bank file
3. Verify it downloads (CSV/Excel format)

7.7 Payroll Summary

Page: /payroll/outputs/summary

- Verify: Run-level summary with totals across all employees

7.8 Payroll Reconciliation

Page: /payroll/outputs/reconciliation

- Verify: Reconciliation between attendance, OT, LOM, and payroll amounts

Phase 8 — Dashboards

8.1 Payroll Status

Page: /dashboard/payroll-status

- Verify: Current payroll run status, progress through pipeline

8.2 Payroll Processing Status

Page: /dashboard/payroll-processing-status

- Verify: Detailed processing status with stage timestamps

8.3 Attendance Summary

Page: /dashboard/attendance-summary

- Verify: Monthly attendance overview, present/absent/late trends

Phase 9 — Edge Cases & Error Handling

9.1 Frozen Month Protection

Test:

1. Try editing attendance for a frozen/finalized month
2. Verify it is blocked with an error message

9.2 Invalid Payroll Transitions

Test:

1. On a DRAFT run, try to Lock directly (skip Approve) !' verify 409 error
2. On a LOCKED run, try to Calculate again !' verify 409 error
3. On a POSTED run, try any action !' verify it is blocked

9.3 Permission Enforcement

Test:

1. Log in as an employee (not HR/admin)
2. Verify OT Approval page shows only "Pending My Approval" (manager scope), not HR scope
3. Verify Payroll pages are inaccessible (403)
4. Verify Comp-off request shows only "My Requests", not all employees

9.4 Company Scoping

Test:

1. If multi-company, switch company context
2. Verify only that company employees/runs appear

9.5 Empty States

Test:

1. Navigate to a month with no payroll run
2. Verify friendly empty state with "Create Run" button

9.6 Early Check-in Snapping (requires new biometric import)

Test:

1. Import attendance where an employee checks in 1 hour before shift start
2. Verify inTime is snapped to shift start (not the actual early punch)
3. Verify working minutes are not inflated by the early arrival

9.7 Auto Weekly-Off / Holiday Detection (requires new biometric import)

Test:

1. Import attendance for a Sunday where an employee worked
2. Verify isWeeklyOffWorked = true automatically
3. Import attendance for a declared holiday !' verify isHolidayWorked = true
4. Import attendance for a regular weekday !' verify both flags = false

9.8 Early Checkout LOM (requires new biometric import)

Test:

1. Import attendance where employee checks out 30 min before shift end
2. Verify earlyOutMinutes = 30 on the daily attendance record
3. Verify it appears in the LOM Approval queue
4. Approve it !' verify payroll deducts the minutes
5. Reject another !' verify no deduction

Phase 11 — Test Checklist Summary

Tick each box as you complete the test. Do not skip any phase.

Phase 0 — Server

- & SQL Server is running (Test-NetConnection succeeded)
- & Next.js dev server is running (npm run dev)
- & Logged in successfully (hrms-token cookie set)
- & Quick health check passed (3 pages loaded without errors)

Phase 1 — Masters

- & 1.1 Shift Master — viewed and edited
- & 1.2 Departments — verified list
- & 1.3 Holiday Master Tab A — declared holidays CRUD
- & 1.3 Holiday Master Tab B — department weekly-off toggle
- & 1.3 Holiday Master Tab C — yearly leave calendar add/remove
- & 1.4 LOM Config — verified and tested edit
- & 1.5 Payroll Workflow Config — toggled stages
- & 1.6 OT Plans — verified
- & 1.7 Comp-Off Policy — verified
- & 1.8 Approval Chain Config — verified

Phase 2 — Employee & Salary

- & 2.1 Employee Master — 12 active, oldEmployeeCode matches biometric
- & 2.2 Salary Structure — components and rates set

Phase 3 — Biometric & Attendance

- & 3.1 Biometric — fetched attendance, employees matched
- & 3.2 Daily Attendance — flags auto-set, early-out calculated
- & 3.3 Monthly Attendance — finalized without errors
- & 3.4 Attendance Overview — department summary visible
- & 3.5 Time Office Final — consolidated view visible

Phase 4 — Approvals

- & 4.1 OT — single approve (Manager -> HR), bulk approve, reject
- & 4.2 LOM — bulk approve, reject, tab counts correct
- & 4.3 Mispunch — verified
- & 4.4 Leave — verified
- & 4.5 Permission — verified

Phase 5 — Shift Management

- & 5.1 Shift Plan — override created and removed, navigation works
- & 5.2 Shift Change Request — full approval chain, override created
- & 5.3 Shift Notifications — unread -> read, mark all read
- & 5.4 Bulk Shift Upload — CSV uploaded, valid + invalid rows handled

Phase 6 — Comp-Off

- & 6.1 Comp-Off — request created, duplicate prevented, approved, rejected

Phase 7 — Payroll

- & 7.1 Salary Processing — full pipeline (Create -> Calculate -> Approve -> Lock -> Post)
- & 7.2 Additions/Deductions — added and verified
- & 7.3 Bulk Upload Benefits — verified
- & 7.4 Payslip Individual — all sections rendered, net = gross - deductions
- & 7.5 Payslip Bulk — verified
- & 7.6 Bank Transfer File — generated and downloaded

- & 7.7 Payroll Summary — verified
- & 7.8 Payroll Reconciliation — verified

Phase 8 — Dashboards

- & 8.1 Payroll Status — verified
- & 8.2 Payroll Processing Status — verified
- & 8.3 Attendance Summary — verified

Phase 9 — Edge Cases

- & 9.1 Frozen month protection — blocked
- & 9.2 Invalid payroll transitions — 409 errors
- & 9.3 Permission enforcement — employee role restricted
- & 9.4 Company scoping — verified
- & 9.5 Empty states — friendly message shown
- & 9.6 Early check-in snapping — verified (new import)
- & 9.7 Auto weekly-off/holiday detection — verified (new import)
- & 9.8 Early checkout LOM — verified (new import)

Testing Complete!

All phases tested successfully
