3. Unwanted Modules Analysis

Each new submodule was reviewed for necessity. Verdict: all 8 are wanted and serve a distinct purpose in the HRMS workflow.

Submodule	Verdict	Reason
Approval Chain Config	KEEP	Required for multi-stage shift-change & LOM approvals. No existing equivalent.
Shift Plan	KEEP	Core workforce module. No existing shift assignment view existed.
Shift Change Request	KEEP	Employee self-service for shift changes. Uses Approval Chain.
Shift Notifications	KEEP	Audit trail for shift changes. Lightweight view, no duplication.
Bulk Shift Upload	KEEP	Bulk operations for large workforce. CSV upload, no duplication.
Comp-off Request	KEEP	Employee comp-off claiming workflow. Distinct from leave entry.
Additions & Deductions	KEEP	Bulk ad-hoc workbench. Complements (not duplicates) payslip single-add.
LOM Approval	KEEP	Approval queue for Loss-of-Minutes. Distinct from OT Approval.

Note: "Additions & Deductions" may appear similar to the payslip's "+ Add Earning/Deduction" button, but it serves a different purpose:

- Payslip: add ad-hoc items for ONE employee at a time
- Additions & Deductions: add ad-hoc items for MANY employees in one workbench

Both are kept. Neither is unwanted.

6. Payroll Calculation Formula (Corrected)

The payroll engine computes each employee's net salary as follows:

EARNINGS (+)

Gross = Sum of salary components $\times$ (payableDays / totalWorkingDays)

OT = (gross / totalDays / 8) $\times$ OT hours $\times$ OT multiplier

Other Earnings = attendance bonus + petrol + shift incentive + ad-hoc earnings

Total Earnings = Gross + OT + Other Earnings

DEDUCTIONS (-)

PF Employee = min(PF wage, ceiling) $\times$ 12%

ESI Employee = ESI wage $\times$ employee % (if below ceiling)

Professional Tax = slab-based by state

TDS = based on regime + slabs + declarations

LOM = per-day: max(late+early - 15 grace, 0), capped at 240/day $\times$ rate

Other Deductions = LWF + health insurance + LIC + canteen + loans + ad-hoc

NET SALARY

Net = Total Earnings - Total Deductions

Note: OT is counted ONCE (inside Other Earnings). Bug fixed today.

7. Worked Example — RC027 Suresh (July 2026)

Input: BASIC 15000 + HRA 7000 + CONVEYANCE 3000 = 25000/month

Attendance: 30.5/31 payable days, 499 OT minutes, 1305 late minutes

Component	Formula	Amount	Type
BASIC	$15000 \times (30.5/31)$	14,758	Earning +
HRA	$7000 \times (30.5/31)$	6,887	Earning +
CONVEYANCE	$3000 \times (30.5/31)$	2,952	Earning +
Overtime	$8.32 \text{ hrs} \times 99.18/\text{hr} \times 1.25$	1,031	Earning +
PF Employee	$\min(24597, 15000) \times 12\%$	1,800	Deduction -
LOM	$890 \text{ min} \times 1.65/\text{min} \text{ (per-day grace)}$	1,471	Deduction -
CAT Deduction	$500 \times (30.5/31)$	492	Deduction -
Total Earnings		25,628	+
Total Deductions		4,763	-
NET SALARY	$25628 - 4763$	21,865	Net
